Shahzad Fareed

Faisalabad , Punjab, Pakistan | mailto://shahzadfareed38.sf@gmail.com
+923067229254 | *LinkedIn* | *Portfolio* |Github

Software Engineer with strong foundations in Object-Oriented Programming and hands-on experience in Python & C++. Skilled in embedded systems development, industrial automation, and API development. Focused on building efficient real-world solutions.

EXPERIENCE

Backend Developer Intern *Oct 2025 - Present*
Devigners, USA

- Built and tested Python-based APIs, improving data processing and backend functionality.
- Performed API testing and debugging using Postman to ensure reliable performance of web.
- Implemented version control practices using Git and GitHub for collaborative development.
- Collaborated on UI/UX concepts using Figma and streamlined development using VS Code.
- Designed and managed NoSQL databases using MongoDB for efficient data handling.

EDUCATION

Bachelor of Science (B.S.) – Software Engineering *Sep 2020 - Present*
Virtual University of Pakistan

Diploma of Associate Engineering (DAE) – Mechanical Technology *Sep 2014 - Jun 2017*
Punjab Board of Technical Education Lahore

PROJECTS

Human Detection and Tracking System (Computer Vision) *Oct 2025 - Present*

- Developed a real-time human detection and tracking system using Python and OpenCV.
- Implemented object detection using YOLO model for accurate person/object identification.
- Applied centroid tracking algorithm to monitor movement and count people with accuracy.
- Processed video streams (CCTV/live camera) for real-time analytics and people behaviors.
- Improved detection accuracy and system performance through well optimization techniques.

REST API Development (Python) *Dec 2025 – Feb2026*

- Developed RESTful APIs using Python fast API for data processing and system integration.
- Implemented CRUD operations and structured endpoints for better efficient communication.
- Tested and validated APIs using Postman to ensure reliability and performance and security.
- Applied version control using Git and GitHub for teamwork and collaborative development.
- Integrated MongoDB for data storage and retrieval for high performance APIs development.

SKILLS

Problem Solving, Troubleshooting, Conflicts Resolution, API Development, Python, API Testing, Teamwork, Collaboration, Debugging, Team management, Active listening, Resource management.

LANGUAGES

English (Intermediate).
